

Module 03 Assignment

SQL Filtering, Clauses & Data Analysis

Instructions

- Use SQL Server.
- Write SQL queries for all questions.
- Do not modify the table structure.
- Use appropriate SQL clauses and operators wherever required.
- Submit only the SQL queries.

Question 1

Display the Employee Name, Department, and Salary of all employees whose salary is greater than ₹60,000 and who belong to either the IT or Finance department.

Question 2

Display all employees whose names contain the letter 'a' anywhere in their name.

Question 3

Display the unique list of departments available in the Employee table.

Question 4

Display the Top 3 highest-paid employees along with their Department and City information.

Question 5

Create a new column named **BonusStatus** using a CASE statement with the following conditions:

None

Bonus IS NULL

→ No Bonus

Bonus < 5000 → Standard Bonus
Bonus >= 5000 → High Bonus

Display Employee Name, Bonus, and BonusStatus.

Question 6

Find the total number of employees, total salary, and average salary for the entire company.

Question 7

Generate a department-wise report showing:

None
Department
Employee Count
Average Salary
Highest Salary
Lowest Salary

Question 8

Display only those departments whose average salary is greater than ₹65,000.

Sort the result by Average Salary in descending order.

Question 9

Generate a city-wise employee report showing:

None
City
Number of Employees
Average Salary
Total Salary

Display only cities having more than one employee.

Question 10

Using the ActiveEmployees and ProjectEmployees tables:

a)

Display all unique employees from both tables.

b)

Display employees who are present in both tables.

c)

Display employees who are present in ActiveEmployees but not in ProjectEmployees.

Question 11

Generate a department performance report with the following columns:

None

Department

Employee Count

Average Salary

Department Category

Rules:

None

Average Salary $\geq$ 80000 $\rightarrow$ High Performing

Average Salary $\geq$ 60000 $\rightarrow$ Medium Performing

Else $\rightarrow$ Needs Improvement

Sort the report by Average Salary in descending order.
